

Year One at work

Summer 2017 >

Our topic this

half term is

Paws, Claws

Whiskers and Wriggle
and Crawl!

From pets at home to animals in the zoo, in Science we will be finding out what animals like to eat and where they like to sleep.

We will be looking at the world map to see which country animals come from as part of our Geography studies.

We will also be exploring our school grounds for creature that wriggle and crawl. We will be identifying insects and looking at life cycles.

Welcome back!

This half term we are going to be pet and animal detectives with lots of exciting and practical learning activities based around animals.

You can help your child by:

- listening to and encouraging them to read regularly. You could visit the library to find books on animals.
- reading non-fiction books about animals.
- encouraging them to have a go at making their own animal fact-file or painting an animal portrait. Bring them in, we'd love to see them!
- visiting a zoo, farm or pet shop. Take photos and bring them in to share with the class.

**Summer Fayre will take place on
Wednesday 5th July 4-6.00pm**

In Art and DT we will be investigating pattern, making animal masks and modelling animals using clay and plasticine.

We will be using computers and technology to search for images of our favourite animals.

**Lower school
Sports Day will be on
Friday 7th July 1-3.00pm**
