

Nursery Spring 2

# How many colours in a rainbow?

This term our new topic is called, How many colours in a rainbow?

We will be exploring all the colours of the rainbow in the immediate and wider environment. We will be learning all about what happens when we mix and dilute colours, singing songs about colours and creating a colourful rainbow fish

You can help at home by talking about your favourite colours, colour mixing, reading colour-related stories together and (weather permitting!) perhaps spot a rainbow in the sky.
