

Nursery Summer 2

How many pebbles on the beach?

This term our new topic is called 'How many pebbles on the beach?'

We will be learning all about what can be found at the seaside, which creatures live under the sea and investigating the body parts of real fish/shellfish. We will also be using sand and other seaside artefacts to create a beach scene picture and use our estimating and counting skills to guess how many pebbles are on our nursery 'beach'.

You can help at home by taking your child to a local beach or seaside resort, making sandcastles, and reading seaside/under the sea stories together.
